WHY WOOD?

Numerous studies from around the world (Finland, Switzerland, Canada, USA,) which analyzed the environmental impact of building materials concluded decisively that;

- ✓ wood requires the least energy in the manufacturing process
- ✓ wood has positive benefits during its useful lifecycle
- ✓ wood has the least environmental impact at the end of its intended use

We specialize in the manufacturing of stile and rail wood doors for residential and commercial projects with specific or unique design requirements.

EXPERIENCE, TECHNOLOGY & SERVICE EXCELLENCE

Our stellar combination of decades of construction industry experience, modern technology and a talented workforce ensures that we have a good understanding of our customer's needs and the quality product and service excellence our discerning clients expect.

We deliver...

- Products that perform well
- Service with respect and integrity
- Value measured by the service life of the product

Our plant is equipped with modern machines, including several CNC routers and computerized optimizing saw, to provide accuracy, flexibility and safety in the production of high quality wood doors.

OUR DOORS

Wood doors with true stile and rail construction provide timeless, elegant appearance with a long service life. Function and esthetics combine for a lifetime of enjoyment.
